

METHOD AND SYSTEM USING RETURN LABELS WITH DYNAMICALLY
GENERATED MULTIPLE DATAPOINT CODING

ABSTRACT OF THE DISCLOSURE

5 A method of providing returnable customer items,
originally purchased from a merchant. The merchant
provides the customer with a special returns label that
permits the customer to drop the return package with a
carrier without paying shipping charges to the carrier.
The label includes an integrated machine readable code,
which permits a returns center to easily assess shipping
charges and perform other services related to the return.
